

LYNN SEGUIN

Well my history in Himalayans goes back to the time the breed was first being developed as a breed. The Himalayan was a dream of many breeders around the world, a Persian looking cat with just the color pattern of the Siamese. This is how we picked DREAMZ as our cattery name. I was born the same year this breed got recognized as a breed, now wasn't that meant to be. I went to my first cat show at the age of 14 in Ottawa, and 2 years later bought my first Himalayan. After being in the cat fancy for many years I left the fancy for about 10 years and came back to it with Ben my husband, and we developed our line of very rare colored Himalayans and Persians. We moved up into the fancy very fast since our return we've produced 4 Grand Champions, 2 Canadian National Winners, one of which received the Best Himalayan of the year award for being the highest scoring Himalayan of 2009-10. One of our Grands is a Chocolate Persian which is very rare to achieve such an honour. I went through school for genetics and have written 2 articles in Cat Tracks on genetics for breeders. Besides my cats and genetics my other passion is painting, and several of my oil paintings can be found on our site. The newest part of our cattery group is my lovely niece JADE. She started going to the shows at 14 and her love is growing. She can be seen at many shows along with us helping out and she is becoming a great addition to DREAMZ. Lets hope her love for the fancy will grow and blossom as mine did over the years.
